SKILLS

Python, Flask, Docker, React, Redux, Express, JavaScript, PostgreSQL, Chai, Mocha, React Testing Library, Node.js

Looking-to-Learn

React Native, AWS, TypeScript

PROJECTS

imma-Zone (React, Redux, React Testing Library, Mongoose, MongoDB, Express, TailwindCSS)

[live](#) | [github](#)

Amazon and Zappos inspired e-commerce application

- 72 unit tests using React Testing Library to ensure all components are rendering correctly
- Utilized Redux for all actions regarding creation of new user and products, and listing, adding and removing items from cart

CampPY (Python, Flask, Alembic, SQLAlchemy, Psycopg, React, RestX, Google Map API, Firebase, Material-UI)

[live](#) | [github](#)

A group project to clone Campendium, a website for campers to reserve parking spaces hosted by users

- Implemented user profile picture feature by utilizing Google Firebase storage to upload and download images asynchronously, and used useEffect React hook for smoother upload experience
- Mediated conflicts within team member by coordinating meetings, and promoted harmonious team workflow

LoopOut (React, Python, Flask, Alembic, SQLAlchemy, Psycopg, TailwindCSS)

[live](#) | [github](#)

An original timer application

- Integrated useEffect hook and setInterval for the timer and loading the next timer seamlessly
- Chose TailwindCSS, a non-opinionated framework, to facilitate front-end design with creative control

C.A.R.L (Express, React, Javascript, Pug, PostgreSQL, Sequelize, Bcrypt, Chai, Cheerio, Supertest)

[live](#) | [github](#)

A group project to clone workflow management application

- 117 unit tests that cover 100% of the back-end, rendering of the homepage and submission forms
- Constructed database with Sequelize, and used RESTful back-end routes for interacting with the database

EXPERIENCE

Department Head & Manager

WA market & WOORAHMAN

May 2019 - Jan 2020

- Headed a new bakery department opening for a supermarket competing with COSTCO
- Acquired \$150,000 of equipment and tools, established a deal with a French dough vendor, and designed display section
- Reduced monthly food cost by \$10,000+ by including unused cuts of beef into the menu
- Enhanced quality of service by training entire staff in customer service
- Learned to butcher and portion beef to streamline kitchen operations

Co-Founder

MO' COZI

Mar 2018 - May 2019

- Founded a 1600sq ft wine & craft beer restaurant from procuring location to menu and concept design
- Produced monthly sales report using Google Sheets and managed inventory and contact with vendors
- Created 3 signature dishes and 1 side dish to a menu of 12 items

EDUCATION

App Academy - Software Development | March 2020

- 1000-hour immersive full-stack software development bootcamp with <3% acceptance rate

New York University - Individualized Studies | Leave of Absence (3.8 GPA)
